JKCS 041

JKCS 041 is a group of galaxies with the distinction of being the farthest away galaxy group from Earth ever observed, as of 2009.^[1] It is estimated to be 9.9 billion light years away,^[2] seen at redshift 1.9.^[3] The cluster is located in the constellation Cetus at a photometrically determined redshift of $z=1.9$ at right ascension $2^{\text{h}} 26^{\text{m}} 44^{\text{s}}$ declination $-04^{\circ} 41' 37''$ (J2000.0).^[4] There are at least 19 members in the cluster.^[2]
